

FARADAY STREET PUBLIC TOILET

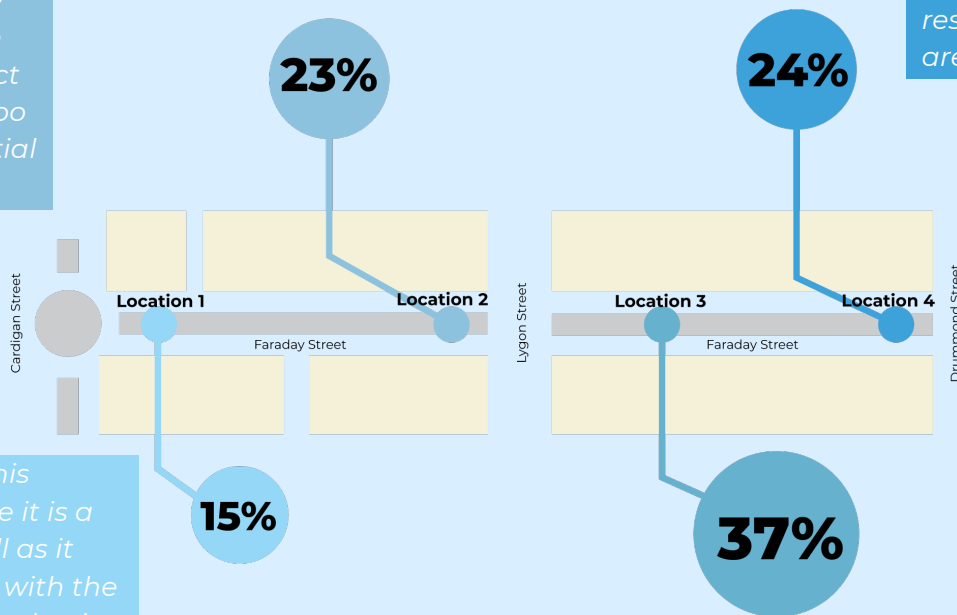

CONSULTATION SUMMARY

In May 2020, the City of Melbourne sought community feedback on a proposal to install a new public toilet on Faraday Street, Carlton. Following previous consultation, four locations were identified, and the community was asked to rank which location they preferred.

PREFERRED LOCATION

"Location 2 is close enough to service both ends of Faraday St as well as the Lygon St precinct without being too close to residential homes."

"It is the furthest point from the residential area."

"I have chosen this location, because it is a busy area as well as it will not interfere with the ascetics of a more busier location such as next to restaurants and other business."

"Location 3 is the best of these options as it is discrete and accessible and provides the least visual impact on this heritage location. It aligns with prior use of this location and has the least negative impact."

FACTORS PEOPLE CONSIDERED MOST

Proximity to shops

Proximity to residential properties

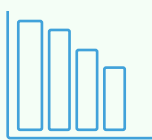

Least interference /change

Visual impact /safety
