LOCATION TO BE DETERMINED

### Objectives of the Flood Mitigation and Stormwater Harvesting project:

- Mitigate Flooding locally and for the downstream precinct.
- Reuse water for irrigation in Ievers Reserve and the local precinct which is expected to save 30,000,000 litres of potable water per year.
- Improve stormwater quality for Moonee Ponds Creek and Port Phillip Bay.
- Improve soil moisture and water security for trees and parklands.
- Provide urban cooling during summer.
