

## STATEMENT OF SIGNIFICANCE

**Heritage Place:** Former Bank of Adelaide Building

**PS ref no:** HO1317

### What is significant?

The Former Bank of Adelaide Building, 265-269 Collins Street, a multi-storey office building constructed in 1959-60.

Elements that contribute to the significance of the place include (but are not limited to):

- The building's original external form, materials and detailing
- The building's high level of integrity to its original design.

Later alterations made to the street level facade are not significant.

### How it is significant?

The Former Bank of Adelaide at 265-269 Collins Street is of historical and representative significance to the City of Melbourne.

### Why it is significant?

Constructed in 1959-60, to a design by Godfrey & Spowers, Hughes, Mewton and Lobb, the Former Bank of Adelaide Building has a clear association with the postwar building boom which transformed central Melbourne into a modern high-rise city. The design of these commercial buildings from the late 1950s to the mid-1970s – many of which were architect designed – was driven by the commercial demands and prestige afforded by a dominant city presence. The Former Bank of Adelaide Building was constructed as one of the first buildings to exceed the pre-existing 40m (132 foot) height limit within the Melbourne CBD (Criterion A).

The Former Bank of Adelaide Building is a fine and highly intact representative example of a Post-War Modernist commercial building. The building strongly reflects the style which was popular in the 1950s, particularly in central Melbourne, incorporating a curtain wall street facade. The transparent front façade of alternating rows of aluminium-framed glazing and opaque spandrels, and vertical mullions which divide the façade into a grid-like pattern, demonstrate important aspects of the Post-War Modernist style. The incorporation of two contrasting grids in the front façade is unusual and distinctive (Criterion D).
